NARROW-PITCH CONNECTORS FOR BOARD-TO-FPC CONNECTION

NARROW PITCH (0.4mm) CONNECTORS F4

Socket

Header

Compliance with RoHS Directive

2. Strong resistance to adverse environments! Utilizes *TOUGH CONTACT* construction for high contact reliability.

3. Improved mating strength between the socket and header

The simple locking structures provided for the soldering terminals and the contact points improve the mating strength and provide tactile feedback when locked.

Locking structure of the soldering terminals

4. Easy to design product circuits

1) An insulating wall provided for the bottom surface of the connector prevents contact between the pattern on the PCB board and the metal pins, enabling pattern wiring under the connector, and thus contributing to the reduction in size of PC boards.

Pattern wiring under the connector is possible.

5. Connectors for inspection available
Connectors for inspection are available that are ideal for modular unit inspection and inspection in device assembly processes.

APPLICATIONS

Compact portable devices "Cellular phones, DVD, DSC, etc"

Example of connection between a board and an FPC

FEATURES

1. The lowest profile class among two-piece connectors in the world (Mated height: 0.9mm)

Achieved both a 0.4 mm pitch and an ultra low profile of 0.9 mm high when mated, contributing to further thickness reduction of products.

AXK7L, 8L

ORDERING INFORMATION

AXK **G**

AXK: Narrow Pitch Connector Series

Series name;

7L: F4 (0.4 mm pitch) Socket

8L: F4 (0.4 mm pitch) Header

Number of contacts (2 digits)

Mated height

<Socket>

2: For mated height 0.9 mm

<Header>

1: For mated height 0.9 mm

Functions

2: Without positioning bosses

Surface treatment (Contact portion / Terminal portion) ^{Note 2}

<Socket>

7: Ni plating on base, Au plating on surface (for Ni barrier available)

<Header>

5: Ni plating on base, Au plating on surface

Other specifications

<Header>

B: Soldering terminals with fork type terminal ^{Note 1}

Packing

G: 3,000 pieces embossed tape and plastic reel × 2

Notes: 1. "B" in the 11th digit of the header part number signifies a fork type soldering terminals to lessen the constraint on amount of solder when mounting, and a construction that makes it difficult when mounting for excess solder to interfere with the socket.

Although compatible with the previous parts, these parts are not compatible with the recommended PC board pattern and recommended metal mask pattern.

2. The part number will be changed as follows due to the change in the plating specifications for the metal clips.

This change will apply to production from December 2009 onwards. (There will be no change to the contact portion and terminal portion.)

(Socket)

3: Ni plating on base, Au plating on surface (for Ni barrier available)

(Header)

4: Ni plating on base, Au plating on surface

PRODUCT TYPES

- Notes: 1. Regarding ordering units;
During production: Please make orders in 1-reel units.
Samples for mounting confirmation: Available in units of 50 pieces. Please contact us.
Samples: Available. Please contact us.
2. The above part numbers are for connectors without positioning bosses, which are standard. When ordering connectors with positioning bosses, please contact our sales office.
3. Please contact us regarding different number of contacts.
4. "B" in the 11th digit of the header part number signifies a fork type soldering terminals to lessen the constraint on amount of solder when mounting, and a construction that makes it difficult when mounting for excess solder to interfere with the socket.
Although compatible with the previous parts, these parts are not compatible with the recommended PC board pattern and recommended metal mask pattern.
5. Since the plating specifications for the metal clips will be changed starting with production in December 2009 onwards, the digit "7" in the 10th place of the part number for sockets will be changed to "3", and "5" for headers will be changed to "4".
Be careful when placing an order.

SPECIFICATIONS

1. Characteristics

	Item	Specifications	Conditions
Electrical characteristics	Rated current	0.3A/terminal (Max. 5 A at total terminals)	—
	Rated voltage	60V AC/DC	—
	Breakdown voltage	150V AC for 1 min.	Rated voltage is applied for one minute and check for short circuit or damage with a detection current of 1mA
	Insulation resistance	Min. 1,000MΩ (Initial)	Using 250V DC megger (applied for 1 min.)
	Contact resistance	Max. 90mΩ	Based on the contact resistance measurement method specified by JIS C 5402.
Environmental characteristics	Ambient temperature	-55°C to +85°C	No freezing at low temperatures
	Soldering heat resistance	Max. peak temperature of 260°C (on the surface of the PC board around the connector terminals)	Infrared reflow soldering
		300°C within 5 sec, 350°C within 3 sec.	Soldering iron
	Storage temperature	-55°C to +85°C (Product only) -40°C to +50°C (Emboss packing)	No freezing at low temperatures
	Thermal shock resistance (header and socket mated)	5 cycles, insulation resistance min. 100MΩ, contact resistance max. 90mΩ	Sequence 1. -55 [±] 3°C, 30 min. 2. ~, Max. 5 min. 3. 85 [±] 3°C, 30 min. 4. ~, Max. 5 min.
	Humidity resistance (header and socket mated)	120 hours, insulation resistance min. 100MΩ, contact resistance max. 90mΩ	Temperature 40±2°C, humidity 90 to 95% R.H.
	Saltwater spray resistance (header and socket mated)	24 hours, insulation resistance min. 100MΩ, contact resistance max. 90mΩ	Temperature 35±2°C, saltwater concentration 5±1%
H ₂ S resistance (header and socket mated)	48 hours, contact resistance max. 90mΩ	Temperature 40±2°C, gas concentration 3±1 ppm, humidity 75 to 80% R.H.	
Lifetime characteristics	Insertion and removal life	50 times	Repeated insertion and removal speed of max. 200 times/hours
Unit weight		20 contacts; Socket: 0.03g Header: 0.01g	—

AXK7L, 8L

2. Material and surface treatment

Part name	Material	Surface treatment
Molded portion	LCP resin (UL94V-0)	—
Contact/Post	Copper alloy	Contact portion: Ni plating on base, Au plating on surface Terminal portion: Ni plating on base, Au plating on surface (Except for front edge of terminal) However, the area adjacent to the socket terminal is exposed to Ni on base. Metal clips ^{Note)} : Ni plating on base, Sn plating on surface (Socket: except for front edge of the terminal)

Note: The following change will apply to production from December 2009 onwards.
 Socket: Ni plating on base, Pd + Au flash plating on surface (Expect for front edge of terminal)
 Header: Ni plating on base, Au plating on surface (Expect for front edge of terminal)

• Socket and header are mated

EMBOSSED TAPE DIMENSIONS (unit: mm) (Common for respective contact type, socket and header)

Tape dimensions (Conforming to JIS C 0806-1990. However, some tapes have mounting hole pitches that do not comply with the standard.)

Plastic reel dimensions (Conforming to EIAJ ET-7200B)

TABLE OF DIMENSIONS

Mated height	Number of contacts	Type of taping	A	B	C	D	Quantity per reel
Common for socket and header: 0.9mm	Max. 24	Tape I	16.0	—	7.5	17.4	3000
	26 to 70	Tape I	24.0	—	11.5	25.4	3000
	80	Tape II	32.0	28.4	14.2	33.4	3000

Connector orientation with respect to direction of progress of embossed tape

Socket

Header

Compliance with RoHS Directive

FEATURES

- 1. 3,000 insertion and removals (when as recommended)**
- 2. Same external dimensions and foot pattern as standard type.**
- 3. Improved mating**

Insertion and removal have become easier due to a reduction in the mating retention force required by the simple locking structure and also in the amount of force needed for insertion and removal. (We cannot warrant anything regarding mating retention.)

APPLICATIONS

Ideal for module unit inspection and equipment assembly inspection

TABLE OF PRODUCT TYPES

Socket	Without positioning bosses	AXK7LE**26G	Header	Without positioning bosses	AXK8LE**26BG

- Notes: 1. When placing an order, substitute the "*" (asterisk) in the above part number with the number of contacts for the required connector.
 2. The above part numbers are for connectors without positioning bosses, which are standard. When ordering connectors with positioning bosses, please contact our sales office.

NOTES

1. Removal by pulling up from an end causes the entire connector removal force to concentrate on the soldering terminals and end terminals. Therefore, please lift and remove from the side. Doing so will also prevent cracking of the soldered parts.

2. PC Boards and Recommended Metal Mask Patterns

Connectors are mounted with high density, with a pitch interval of 0.4 to 0.5 mm.

In order to reduce solder bridge and other issues make sure the proper levels of solder are used.

The figures to the right are recommended metal mask patterns. Please use them as a reference.

In particular, if a lot of solder is used in the header retaining soldering terminals, it might interfere with and cause incomplete socket mating. Therefore, please follow the recommended conditions give on the right.
